1. Assegure-se de que o motor esteja desligado e frio.

3. Compare-o com o cabo mais comprido do jogo de cabos Champion (pode haver casos em que os comprimentos sejam ligeiramente diferentes).

4. Limpe com um pano a tampa do distribuidor e o isolador da vela.

6. Segurando o cachimbo da vela, empurre e gire até que o extremo encaixe firmemente no terminal da vela. Havendo necessidade de usar um lubrificante, utilize massa de silicone e **nunca** óleo penetrante.

Teste se o cachimbo está devidamente seguro puxando-o.

Este não deverá soltar-se com facilidade.

2. Retire apenas o cabo de ignição mais comprido. Ao retirá-lo, segure pelo cachimbo rodando-o.

**Nunca puxe pelo cabo.**

5. Coloque firmemente o terminal do distribuidor do cabo na tampa do distribuidor, extraindo o ar do cachimbo por forma a assegurar um acoplamento preciso e seguro.

7. Repetir os passos 4 a 6 com os restantes cabos de ignição por ordem decrescente de comprimentos e instalá-los nas mesmas posições originais. Assegure-se de que os cabos de ignição conectados ao cilindro consecutivo mantêm-se separados.
